

The case of Swedish-Iranian doctor Ahmadreza Djalali is urgent. Dr. Djalali is being held as a political prisoner in Iran, accused of espionage, sentenced to the death penalty. On the 24th of November, Dr. Djalali made a phone call to his wife Vida Mehrannia, to tell her that he has been moved to the Karai-prison, where he will await his punishment in isolation. All indicates that Iranian authorities have the intention of carrying out the execution of Dr. Djalali within the near future.

This is cause for urgent action from the European Union. With Dr. Djalali being a Swedish citizen, and thereby a citizen of the European Union, the EU bears a responsibility to put pressure on the Iranian government to immediately and unconditionally liberate Dr. Djalali.

How will the High Representative Mr Borell and the European Union act to put an immediate stop to the inhuman treatment and unlawful execution of European citizen Ahmadreza Djalali?

What urgent actions will be taken by the European Union to demand for Dr. Djalali's release from his sentence and from Iranian prison?
